

## MSM27C402CZ

262,144-Word x 16-Bit or 524,288-Word x 8-Bit One Time PROM

### DESCRIPTION

The MSM27C402CZ is a 4Mbit electrically Programmable Read-Only Memory whose configuration can be electrically switched between 262,144 word x 16bit and 524,288 word x 8bit. The MSM27C402CZ operates on a single +3.3V - 5V power supply and is TTL compatible. Since the MSM27C402CZ operates asynchronously, external clocks are not required, making this device easy-to-use. The MSM27C402CZ is suitable as large-capacity fixed memory for microcomputers and data terminals. It is manufactured using a CMOS double silicon gate technology and is offered in 40-pin DIP, 40-pin SOP or 44-pin TSOP packages.

### FEATURES

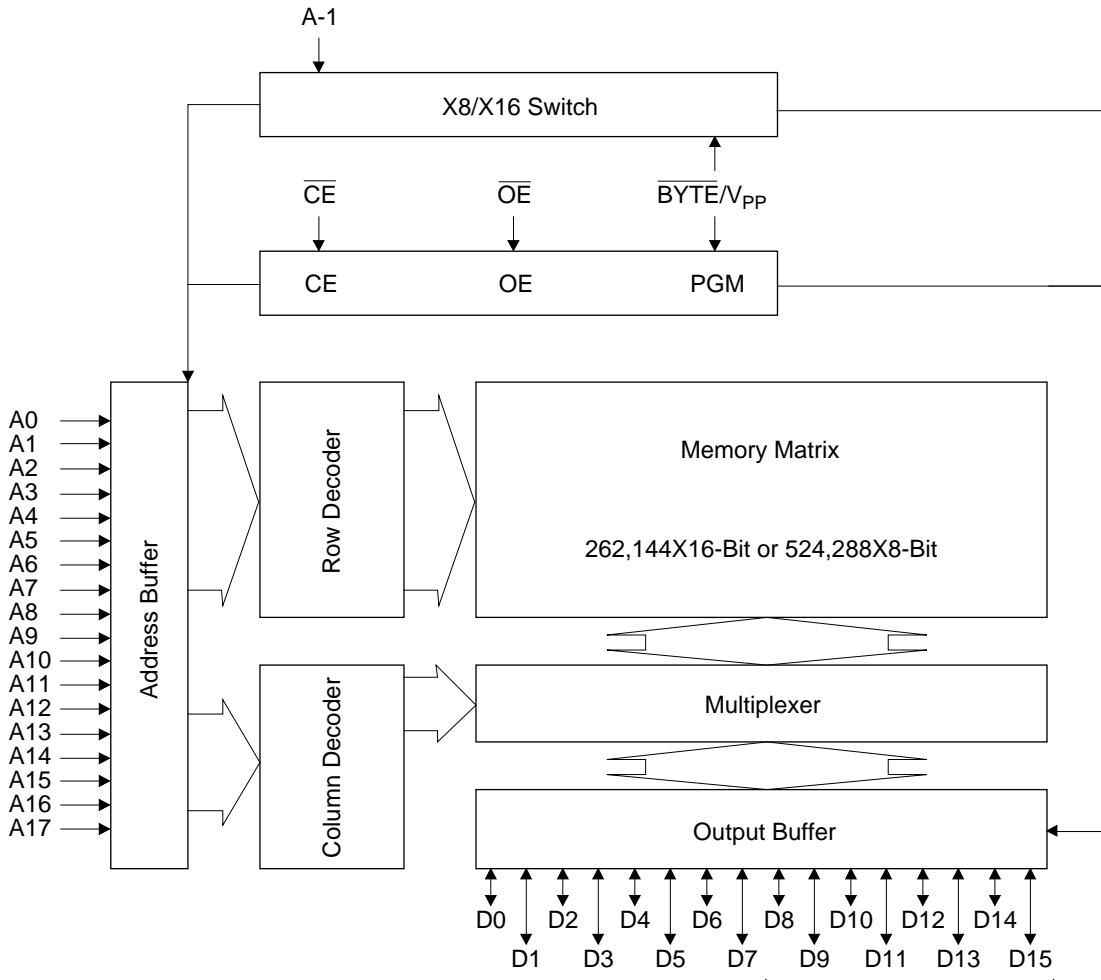

- 262,144 word x 16bit / 524,288 word x 8bit electrically switchable configuration
- Single +3.3V - 5V power supply
- Access time           120ns (V<sub>cc</sub>=3.3V)  
                              80ns (V<sub>cc</sub>=5V)
- Input / Output TTL compatible
- Three-state output
- Packages                40-pin plastic DIP (DIP40-P-600-2.54)  
                              40-pin plastic SOP (SOP40-P-525-1.27-K)  
                              44-pin plastic TSOP (TSOP II 44-P-400-0.80-K)

## PIN CONFIGURATION (TOP VIEW)

PIN NAMES	FUNCTIONS
D15/A-1	Data output / Address input
A0 - A17	Address input
D0 - D14	Data output
CE	Chip enable
OE	Output enable
V <sub>CC</sub>	Power supply voltage
V <sub>SS</sub>	GND
BYTE/V <sub>PP</sub>	Mode switch / Program power supply voltage
NC	Non connection

**BLOCK DIAGRAM**

In 8-bit output mode, these pins are three-stated and pin D15 functions as the A-1 address pin.

## **NOTICE**

The information contained herein can change without notice owing to product and/or technical improvements. Before using the product, please make sure that the information being referred to is up-to-date.

The outline of action and examples for application circuits described herein have been chosen as an explanation for the standard action and performance of the product. When planning to use the product, please ensure that the external conditions are reflected in the actual circuit, assembly, and program designs.

When designing your product, please use our product below the specified maximum ratings and within the specified operating ranges including, but not limited to, operating voltage, power dissipation, and operating temperature.

Oki assumes no responsibility or liability whatsoever for any failure or unusual or unexpected operation resulting from misuse, neglect, improper installation, repair, alteration or accident, improper handling, or unusual physical or electrical stress including, but not limited to, exposure to parameters beyond the specified maximum ratings or operation outside the specified operating range.

Neither indemnity against nor license of a third party's industrial and intellectual property right, etc. is granted by us in connection with the use of the product and/or the information and drawings contained herein. No responsibility is assumed by us for any infringement of a third party's right which may result from the use thereof.

The products listed in this document are intended for use in general electronics equipment for commercial applications (e.g., office automation, communication equipment, measurement equipment, consumer electronics, etc.). These products are not authorized for use in any system or application that requires special or enhanced quality and reliability characteristics nor in any system or application where the failure of such system or application may result in the loss or damage of property, or death or injury to humans. Such applications include, but are not limited to, traffic and automotive equipment, safety devices, aerospace equipment, nuclear power control, medical equipment, and life-support systems.

Certain products in this document may need government approval before they can be exported to particular countries. The purchaser assumes the responsibility of determining the legality of export of these products and will take appropriate and necessary steps at their own expense for these.
